*Special thanks to the IMSA Fund for Advancement of Education for underwriting the use of the Paramount Theatre for Commencement.*

*The need to understand how the universe works is fundamental to human nature. It is also essential for safely managing the human future; but foolishly, we have designed a society based on science and technology in which hardly anyone understands science and technology. This is a clear prescription for disaster.*

*Our future depends on producing and encouraging highly competent, ethically responsible young scientists, as well as a much greater scientific literacy in the general public.*

*The Illinois Mathematics and Science Academy in Aurora, Illinois, is dedicated to meeting this challenge... It is a gift from the people of Illinois to the human future.*

Dr. Carl Sagan, 1934-1996
